Part 1: News and Infos

1. Spanish fishery again on 80 m

Spanish fishermen were daily abusing 3500, 3510, 3520, 3530, 3540 and 3560 on USB every morning and evening.

2. 28 MHz – OTH radar Iran as usual

The OTH radar from Iran was often disturbing 28000 and 28600 kHz with strong splatters +/- 400 kHz. Parameters: 307 and 870 sweeps/sec. You can hear a deep and a high tone.

3. Turkish OTH radar on 10 m

A Turkish OTH radar was observed on 28000 kHz (center) on October 9th. Parameters: 12.5 sps, covering 40 kHz. Screenshot: DK2OM

4. OTH radar covering 80 % of 40 m-band

Strong disturbances by an OTH radar on October 26th and 27th in the evening hours. Parameters: 10 sps and 160 kHz wide. Burstlength: 51 and 102 sec. Location: NW-China
Screenshot: DK2OM via remote Japan

5. CIS taxi flood on 10 m and Far East intruders

CIS taxis were flooding the whole 10 m-band on FM daily, mostly from Russia. The MUF (maximum usable frequency) was rather high, and the F2 layers were strong and stable. Some people believe that the taxi flood were audible by the Sporadic E layers. This is not correct! Nobody seems to be able to stop the taxi intrusions. Many Far East intruders were found on FM in the mornings.

6. Spurious emissions on 21435 kHz

Radio Free Asia was transmitting every Tuesday (1000 utc) on 21455 kHz being jammed by a Chinese BC transmitter. The Chinese transmitter produced strong spurious emissions covering +/- 10 kHz. The German PTT (BNetzA) was informed by DK2OM.

7. 14295.1 BC harmonic from Radio Tajik

The harmonic emission from 4765 kHz was still existing. We do not expect any change before the year 2020.

8. Beacon "V" on 7091.5 kHz

A mysterious beacon "V" was audible on 7091.5 kHz on Oct. 18th. Location: Almaty – Kyrgyzstan

9. Beacon "D" from Sevastopol – triple action

The cluster beacon "D" was active on 7000.0, 7038.7 and 7077.4 kHz.- Russian Navy Sevastopol

Screenshot: DK2OM

10. Illegal defender

A German Ham tried to disturb a legal military transmission from Russia on 80 m. The 80 m-band is assigned on primary base, but not exclusive. The illegal action happened on 3733.0 kHz on Oct. 22nd at 2000 utc. The FSK transmission (75 Bd – 250 Hz shift) came from Kaliningrad. W-Code screenshot by DK2OM – showing “dashes” on the space QRG and the spurious emissions (2 kHz wide!) from the “defender”. The same person is known for his emissions on 7 MHz, too.

ARSK MONITORING OVERVIEW FOR OCTOBER 2014

Radio Hargeisha on 7120 kHz continued as usual, but Uganda Radio on 7195 kHz was no longer heard. Unidentified intruders using KiSwahili (who may be military) on 7,000 kHz and others unidentified on 7,075 kHz were also active as usual.
